

You **CAN** have greater design flexibility.

INTRODUCING

OPTIX®

Light Diffusing Acrylic Sheet

- Superior diffusion properties allow for greater sign design flexibility and slim profile channel (CAN) letters
- Saves money by requiring less lighting sources and less channel material
- Performance is unsurpassed when used with neon, fluorescent or LED lights
- Eliminates visible hot spots and luminance fluctuations without affecting light transmission properties
- Available in the most popular colors and in custom corporate colors
- Offered in a wide variety of stock sizes with custom sizes also available
- Available sheet sizes: **.118"** - 48" x 96" & 51" x 100"
.177" - 48" x 96", 51" x 100" & 75" x 100"
- Sold in cases and mini-pallets
Case quantities: .118" - 12 per case **Mini pallets:** .118" - 48 sheets per pallet
.177" - 7 per case .177" - 28 sheets per pallet

Typical can lights require a 5" channel depth. OPTIX®-LD Light Diffusing Acrylic Sheet allows for a less costly, better-looking 3" channel depth.
