Dear Valued Customers,

RE: Price Increase of Optix ® Acrylic Polymers

Due to the shortages of feedstock used to make acrylics and significant increases of freight, transportation and energy costs, we have been experiencing historical high cost levels of manufacturing acrylic polymers. Under these circumstances, Plaskolite West Inc. is announcing another price increase on all Optix ® Acrylic Polymers as follows:

<u>Product Type</u>	<u>Price Increase (\$/LB.)</u>
General Purpose Grades	.08
Impact Modified Grades	.08
STAR-15 and STAR-15 HID	.08
Specialty Grades	.08

This price increase will be effective with shipments on or after October 17, 2005.

Your kind understanding is very much appreciated. Plaskolite will continue to provide you with the highest quality products and service.

Sincerely,

Jason Shen
General Manager
Plaskolite West, Inc.
