

First Surface (2-Sided) Mirror

“First Surface” (two-sided mirror) consists of an opaque film of aluminum, protected by a tough clear coating. Light incident from either direction is reflected.

“First Surface” is often used in retail display and special lighting. The dual surface reflection property is ideal for those applications where the back side of the mirror will remain exposed, or where a reflection in both directions is desired. It is available in acrylic or polycarbonate and with a color option. Thicknesses of .118" and .236" offered.

For custom and non-stock sizes and thicknesses, call for availability and delivery information.

Item #	Description	Quantity
C100069M	48" x 96" Film .118" First Surface Mirror	80/pallet
